

APO Finance Platform FAQ

1. ***What is the purpose for this token?***

To raise funds for the project of creating a reverse parimutuel option trading platform.

2. ***What is the purpose for this platform?***

To provide the ability to buy options (including puts) on cryptocurrency.

To provide a platform to trade cryptocurrency options at a fair market price and do not need sellers.

3. ***What will the user be able to do?***

Participants will be able to buy options on crypto-currency.

4. ***What exactly will the user own?***

Users will be able to buy options on cryptocurrency. Initially only ETH, and later to follow with BTC and others. All bids will go into a pool and the users will own their options in the form of APO smart contracts.

5. ***How does the user make money?***

Participants make money by buying winning options.

6. ***What are the risks?***

Participants risk losing the option purchase by buying losing options.

7. ***How do early investors and future holders of APO tokens make money?***

Holders of APO tokens will receive their share of commissions collected by the platform. After the ICO no new tokens will ever be generated.
